Call Sign WQOQ745 and Radio Service PW

Gentlemen:

Please accept this request for a waiver of FCC rule 1.946(d) for late filing of our buildout status for call-sign WQOQ745. The Town of Hanover, Massachusetts, Department of Public Works was granted a license on 12-28-2011 to operate at 470.35/473.35 MHz with a build-out deadline of 12-28-2012. We installed our repeater at Location 1 and 17 of the mobile units (location 6) as indicated on the license and became operational with this equipment on 05/18/2012. We subsequently notified you through a schedule K filing on 10/02/2012. In reviewing the schedule K that we filed, it appears that we may have left the upper frequency (box 2e: 000473.35000000 MHz) off of the form due to our inexperience in filling out these forms. We subsequently ordered the equipment for locations 2-5 as well as the additional mobile radios on 11/6/2012 and 11/30/2012 so that we could complete the build-out of our system. It has taken time for the supplier to fulfill our order. We called the FCC office (888-225-5322) at 8:45 am on 12/28/2012 to make sure we had completed our paperwork and were led to believe that no additional filing was necessary.

We respectfully request reconsideration of your Notice of License Termination Pending Status. To date we have invested \$67,500 in equipment and termination of our license at this time would cripple our ability to manage routine and extraordinary public works and public safety activities within the boundaries of Town of Hanover and in support of the residents of our community as well as prevent us from interoperating with fire, police, and emergency management assets in our community. We thank you for consideration of this request.

Sincerely,

Victor J Diniak
Director of Public Works
